

University of Houston. Henry was an outstanding athlete on the first University of Houston football team. His love of the game was so great that, upon graduation in 1948, he began coaching the Aldine School District football team. His true enjoyment of working with young players and enthusiasm for football soon made him a respected figure at the school. After a 7-year tenure at Aldine, Henry moved to Jackson Jr. High and later to our alma mater, Jeff Davis High School.

It was during his 14-year career at Jeff Davis High School that I came to know Coach Gomez. While a young player on his teams, I learned the true importance of teamwork and cooperation that remains with me today. At Jeff Davis, his influence reached beyond the football field as he worked as counselor and ultimately Vice Principal of the school. He was a leader who drew much admiration from his students, players and colleagues.

Hoping to expand his involvement with the young people of his community, Mr. Gomez transferred to James Deady Middle School where he began another 14-year career as Assistant Principal. He was lovingly known during his tenure as the "Sheriff of Deady," whose firm yet kind demeanor and dedication to the enrichment of young minds drew respect and love from all who knew him.

Upon retirement from his long career in education, Henry Gomez maintained close ties with the Texas school system, where he was involved in both the Houston and Pasadena Area Retired Teacher's Association.

The death of Henry Gomez is a blow to all who loved and respected him. His years of working with students and his devotion to his community touched a countless number of lives, including my own. Those of us who were fortunate enough to have known him will never forget his kind spirit, his leadership in the community, and his dedication to coaching and teaching. He has left a legacy that will never be forgotten.

Mr. Speaker, please join me in paying tribute to the life of Henry Gomez. Those of us fortunate enough to have known him are truly blessed.

INTRODUCTION OF LEGISLATION ESTABLISHING THE "MEDICAL INNOVATION TAX CREDIT"

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 9, 1999

Mr. SAM JOHNSON of Texas. Mr. Speaker, today, Congressman SANDER LEVIN and I have introduced legislation, H.R.—that will establish a new "Medical Innovation Tax Credit." Last year, we introduced similar legislation with strong, bipartisan support. This bill is designed to provide incentives for companies to utilize our Nation's medical schools and teaching hospitals to conduct important clinical testing research. These institutions have led the world on the development of medical advances, including cures for small pox, treatments for diabetes, cancer, and leukemia as well as the eradication of polio. It is important that we make every effort to insure that American

teaching hospitals and medical schools remain leaders in the fight against disease.

Medical schools and teaching hospitals are the training grounds for our nation's health care professionals. They are centers for development of innovative medical technologies and treatments, as well as the backbone for innovation in American medicine. They are able to develop life saving drugs, medical devices and surgical techniques due to their unique position to link research, medical training and patient care. Unfortunately, medical schools and teaching hospitals face serious financial challenges due to profound changes in the health care marketplace. As funding shrinks, so does the vital, life saving medical research they perform.

The Medical Innovation Tax Credit is a response to this alarming decline in utilization of the Country's superior medical facilities for clinical trials. Under the credit, companies would be eligible for an incremental 20% tax credit for expenditures on human clinical trials performed by: (1) non-profit or public medical schools; (2) teaching hospitals owned by or affiliated with an institution of higher learning; (3) a medical research organization affiliated with a medical school or teaching hospital; or (4) non-profit research hospitals that are designated as cancer centers by the National Cancer Institute of the National Institutes of Health. The credit requires that research be performed in the United States, encouraging companies to retain and expand their clinical research projects, rather than relocating such activities abroad.

I urge my colleagues to join with me in the establishment of the Medical Innovation Tax Credit. A tax credit that is truly a "credit for life."

TRIBUTE TO DANIEL GANZ AND BEVERLEE KAUFMAN FOR THEIR 50TH WEDDING ANNIVERSARY

HON. STEVE R. ROTHMAN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 9, 1999

Mr. ROTHMAN. Mr. Speaker, I rise today to pay tribute to Daniel M. Ganz and Beverlee Kaufman, who will be celebrating the 50th anniversary of their wedding on March 27, 1999. It is fitting that they are celebrating this anniversary with their two children (David and Sandy), their friends, and the rest of their family.

For many years, Beverlee and Danny Ganz lived in Rockville Centre, Long Island, where they raised their family and were active in community affairs. Dan, in particular, was very involved with the Recreation Department as a volunteer working with both table-tennis and court-tennis.

They sent their children to the Rockville Centre public school system. David then went off to Georgetown University, in Washington, D.C., and Sandy to Northeastern University in Boston, Massachusetts.

David became a lawyer, practicing in New York City and New Jersey, later served as the volunteer president of the American Numismatic Association, and currently presides as

the Mayor of Fair Lawn, New Jersey. He has just written his 14th book-length work.

Sandy went on to earn a Masters degree in physical therapy, and to find employment as the Associate Director of Physical Therapy at the Manhattan Hospital for Special Therapy. She then became director for the Amsterdam Nursing Home division, and has authored several works on physical therapy treatments.

I met Dan and Bev at David's inauguration as Mayor this past January 1st, and I am glad to know such a devoted couple, who are also two remarkable individuals.

It is rare today that any couple can spend a half century in wedded bliss, but they are two people who have managed it. Dan turns 80 this October and Bev will be 75 in just a few weeks, but they are both still active in their new home in Boca Raton, Florida, playing tennis, golf, and exploring the Internet.

Recently, Dan, who is a World War II veteran with 26 missions in the Triangle "A" squadron in England, used the Internet to reunite with his Captain and navigator, whom he had not seen in 54 years. Last year, he met up with the remainder of his crew. Some of his combat photos, including the Bridge of the Remagen, were included in the wartime exhibit shown at the National Archives in Washington.

He has not stopped giving to his community. In Boca Raton, he has been performing magic—which he has done professionally for nearly 70 years—at hospitals for youngsters with terminal diseases such as AIDS, and for seniors. Bev is now frequently his assistant at these events.

They have three grandchildren (Scott, Elyse, and Pam), daughter-in-law Kathy, and a host of friends and relatives who are joining them and their children in celebration of their first 50 years of marriage. I wish them well and congratulate them on this wonderful achievement.

CONSERVATIVES SUPPORT UNLOCKING AVIATION TRUST FUND

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 9, 1999

Mr. SHUSTER. Mr. Speaker, unlocking the Aviation Trust Fund is a tax fairness issue. Republicans should unanimously support this effort, because it restores honesty to the budget process. A part of the budget surplus comes from aviation user fees that the traveling public pays on a promise from Congress to ensure a safe and efficient transportation system. In ten years, under current aviation investment patterns, it will be neither safe nor efficient.

Moreover, investment in assets for America is a Republican concept and sound transportation infrastructure is the foundation of commerce and our economy. We can credit Theodore Roosevelt with the vision to build the Panama Canal, and Dwight Eisenhower for the Interstate Highway System. Republicans have historically been the party of builders and we should continue to advocate sound federal programs that enrich our nation and our quality of life.
